Samuel Olawuyi

Data Analyst | Agritech Innovator | Animal Health Technologist |
Founder, Samkay Agric Ventures | Sustainable Farming Advocate |
Business Development & Operations Specialist
Ibadan, Oyo State, Nigeria

Summary

Bridging the gap between technical expertise and data-driven strategy. I am a multifaceted professional with a background in Animal Health Technology and a passion for Sustainable Farming, currently leveraging Data Analytics to solve complex business and operational challenges. As the Founder of Samkay Agric Ventures, I understand the intersection of physical operations and financial health. My approach to business development is rooted in "Decision Intelligence" using structured data models to remove guesswork from high-stakes investments. Whether I am optimizing agricultural yields or building financial frameworks for global clients, my goal is to drive efficiency through clarity.

Core Competencies & Impact:

- Financial & Operational Modeling:** Developed a suite of Total Cost of Ownership (TCO) tools, ranging from hardware procurement ROI and payroll automation to complex loan sensitivity analyses.
- Agri-Business Innovation:** Combining my technologist background with data to advocate for sustainable, profitable farming practices.
- Business Development:** Experienced in appointment setting, virtual assistance, and executive support, helping brands scale through organized lead generation and operational excellence.
- Technical Stack:** Advanced Excel (Pivot Tables, Dashboarding, Nested Logic), Data Visualization, and Financial Forecasting. I thrive at the intersection of Agriculture and Technology, using data to build a more sustainable and efficient future.

Whether you are looking to optimize your business operations or discuss the future of Agritech, let's connect.

Project Highlights:

- Consumer Behavior:** Built a Bike Sales Dashboard to identify key demographic purchasing drivers.
- Financial Strategy:** Developed a Loan Interest Sensitivity model to calculate the true cost of debt.
- Operations:** Created an Automated Payroll & Commission system for multi-branch retail teams.
- Procurement:** Built a 2-Year ROI model for hardware (Printer/Car) lifecycle costs.
- Decision Analysis:** Engineered a Weighted Matrix to mathematically rank career and business strategies.

Experience

Samkay Agric Ventures

Founder, Chief Executive Officer & Lead Strategist

May 2019 - Present (6 years 11 months)

Ibadan

As the founder of an emerging agritech venture, I integrate Animal Health Technology with Data Analytics to build a sustainable and financially viable farming model. I manage the end-to-end operations, from livestock health management to financial forecasting and market business development.

Key Responsibilities & Data-Driven Achievements:

Operational Cost Modeling: Designed custom Total Cost of Ownership (TCO) and Return on Investment (ROI) models to evaluate the long-term feasibility of livestock investments and equipment procurement.

Health & Yield Analytics: Apply Animal Health Technology expertise to monitor livestock wellness, using data to track growth rates and optimize feeding schedules for maximum efficiency.

Financial Management: Automated payroll, commission structures, and expense tracking using advanced Excel logic to maintain a lean and transparent bottom line.

Business Development: Lead all outreach and partnership efforts, utilizing professional Appointment Setting and Virtual Assistance techniques to secure vendors and establish market presence.

Strategic Decision Making: Utilize Weighted Decision Matrices to prioritize business growth opportunities, ensuring that resources are allocated to the highest-impact sustainable farming initiatives.
